

Consulting on TISAX®

# Security in the automotive industry

## TISAX® IMPLEMENTED MASTERFULLY

*We identify and evaluate the implementation of specific TISAX® security requirements within your company. Recognition of your TISAX® labels in the automotive market strengthens your clients' trust in your company.*

Our **initial analysis on TISAX®** includes a comprehensive maturity assessment based on the VDA information security assessment.

Depending on your company size and the TISAX® labels you are aiming for, we will evaluate the following assessment objectives:

- Information security
- Prototype protection
- Data protection

As a result of the assessment, you will receive your current compliance status vis-à-vis the TISAX® standard. With our readiness check, you can create the foundation for the further expansion of your information security management system (ISMS).

### The sure way to your TISAX® labels.

With us, you have a partner who can advise you better on all matters. We will support you in the entire **audit management** and **external audit process** so that you receive your TISAX® labels faster. An existing ISO 27001 certification is a good basis for the TISAX® standard that builds on it.

Talk to our specialists. We will be happy to advise you individually on your requirements.

As part of our **consulting on TISAX®**, we identify all the relevant TISAX® requirements and implement the IT security process for you according to the specifications of the German Association of the Automotive Industry (VDA).

Based on your audit result, we will implement the following modules for you:

- IT security policies
- Protection concepts for prototypes
- Data protection measures
- Internal ISMS audits

Thus, you ensure that your ISMS is up to date and TISAX® compliant with excellent protection features.

## ISO 27001 certification

In the course of our **consulting on TISAX®**, we also offer you the implementation of **ISO 27001**.

With an ISO 27001 certification, you will increase the maturity level of **information security** in your company. In this way, you will create a solid foundation for obtaining your **TISAX® labels**.
