

ISO 27001 GAP Analysis & ISO 27001 Consulting

# Effective implementation of the ISO 27001 standard

## READY FOR ANY CHALLENGES

*We provide you with comprehensive advice on the specific ISO security requirements in your company. You benefit from our ISO 27001 specialization at every level.*

Identify all relevant requirements for your company with respect to **ISO 27001** and implement them confidently with our support. In our **GAP analysis**, we evaluate the maturity of security measures according to ISO 27001 with respect to:

- IT policies
- IT security concepts
- IT systems

As a result of the GAP analysis, you will receive your current ISO 27001 **compliance status**. Our prioritization of all identified requirements quickly gives you a customized action plan.

### GAP analysis for the implementation of ISO 27001

Our GAP analysis provides the **starting point** for you to prepare your company to implement ISO 27001 requirements.

Our expertise ensures clarity with respect to your current **IT security organization**. During the GAP analysis, we cover all **security pain points** in your company.

With the knowledge gained from our analysis, you can implement all the critical business processes and continuously enhance their security.

Work with us to smooth the way to **systematic** and **structured implementation of ISO 27001**.

Bring a partner on board who can advise you better in every respect. Take advantage of **our expertise** to ensure more IT security in your organization. With us, you get the significant modules of ISO 27001 from a single source:

- ✓ GAP analysis
- ✓ Consulting
- ✓ Implementation

## Data protection consulting

The **ISO 27001 standard** requires compliance with the applicable law, including the **GDPR**. As part of our data protection consulting, we implement GDPR requirements for you.

We document your records of processing activities and provide advice on data protection impact assessments and data processing agreements. The implementation of data protection requirements is a **bridge to ISO 27001**.
